

ENVIRONMENTAL POLICY STATEMENT

PREMIER MARINAS GROUP (**PMG**) is fully committed to continual improvement to enhance its environmental performance, in order to provide an effectively controlled environmental management system and service. This Policy statement is applicable to all areas of our business and has been implemented to meet the requirements of ISO 14001:2015 and 14064:2018.

We recognise our environmental responsibilities to reduce to a minimum the environmental impact of our activities and the activities of our customers and other stakeholders, to seek ways to conserve natural resources and continually strive to improve the environmental performance of our marina sites.

Our objectives are to:

- Controlling our own direct impacts by reducing or preventing water and air pollution through good management practices and design solutions.
- Managing the impact of our development activities through the reduction of waste, increased recycling, use water and energy more efficiently, promoting renewable energy and encouraging smarter travel choices.
- Influencing the leisure marine industry by embracing sustainable development principles when developing new facilities. Maintain our Environmental Management System in accordance with ISO 14001:2015 Certification

To achieve this we will:

- Continue to develop an Environmental Management System (EMS), which will provide the framework for setting, monitoring and auditing our targets – in accordance with ISO 14001:2015 certification and ISO 14064:2018 verification.
- Establish formal systems in order to verify PMG energy consumption and benchmark its GHG footprint.
- Deliver Key Performance Indicators (KPI's) regarding GHG's, waste management, energy consumption, fuel consumption and purchasing records.
- Comply with relevant legislation and regulation, reviewing mechanisms to ensure environmental advocacy and continual improvement of the management system.
- Ensure PMG staff understand their responsibilities regarding the environment, when conducting their daily activities.
- Work with key stakeholders to ensure compliance throughout our marinas.
- Communicate our objectives to all other stakeholders, consulting the community on the environmental program where required.

This policy will be reviewed at least annually to ensure that it remains relevant and appropriate to the activities of PMG. The arrangements and processes for implementing this policy are controlled through PMG Business Management System.
